Validation Outcome

Note - not all controls and instances are used despite being active. This validation results has only assessed controls that have atleast one instance used in a scenario and contain the > or < inequalities. For more context on why this is reach out to UKXD. Please check individual validation results on the later pages.

Validation Results - Accepted Pass. Check the output, Results CSV has been saved.

Control Validation Results

The below shows a break down of control & instance plus its validation result.
